

Lenovo ThinkSystem DE6600F and DE6600H Storage Arrays

Product Guide

Lenovo ThinkSystem DE6600F and DE6600H are industry-leading end to end NVMe Storage solutions designed to provide high performance, simplicity, capacity, security, and high availability for midrange to highend block NVMe large segment.

The DE6600F and DE6600H deliver enterprise-class storage management capabilities in performance-optimized systems with a wide choice of host connectivity options, flexible drive configurations, and enhanced data management features. The DE6600F all-flash and DE6600H hybrid arrays deliver superior price for performance with sub-100 microsecond response for your most-demanding enterprise applications. For target markets such as: Artificial Intelligence, Big Data Analysts, Oracle/SQL databases, high-performance computing (HPC) and real-time analytics.

DE6600F and DE6600H models are available in a 2U rack form-factor with 24 small form-factor (2.5-inch SFF) NVMe drives and include two controllers, each with 32 GB or 128 GB system memory for a system total of 64 GB or 256 GB. Host interface cards provide 10/25Gb iSCSI, 16/32Gb FC/NVMe-FC, 100Gb IB/NVMe-RoCE host connections and 12Gb SAS expansions.

The Lenovo DE6600F 2U24 SFF enclosure is shown in the following figure. DE6600H looks just like it.

Figure 1. Lenovo DE6600F enclosure controller

Did you know?

The DE6600F and DE6600H are the new NVME offerings under the Lenovo enterprise flash storage systems. With unmatched value on performance and price.

A single DE6600F or DE6600H scales up to 367TB (NVMe) of raw storage capacity, expandable to 1.798 PiB all-SSD for an all-flash system and expandable to 7.741 PiB for a hybrid system.

The DE6600F and DE6600H are entry all-flash and hybrid systems ideal for midsized businesses and remote offices that stream media and run-data analytics.

The DE6600F and DE6600H support multiple storage connectivity protocols with a choice of iSCSI, Fibre Channel, NVMe over Fibre Channel, or NVMe over RoCE.

Key features

The ThinkSystem DE6600F and DE6600H offer the following key features and benefits:

- Scalable, high performance mid-range all-flash and hybrid storage with dual active/active controller configurations with 32 GB or 128 GB system memory per controller for high availability and performance.
- Faster application response times with support for NVMe over Fabrics.
- Improved performance and data protection with Dynamic Disk Pools (DDP) technology, as well as support for traditional RAID 0, 1, 3, 5, 6, and 10.
- Flexible storage protocols to match diverse client needs with support for 10/25Gb iSCSI, 16/32Gb FC/NVMe-FC, 100Gb IB/NVMe-RoCE host connectivity.
- The dual controller enclosure scales up to 367TB (NVMe).
- SAS expansion connectivity to expand scalability and capacity.
- 12 Gb SAS drive-side connectivity with support for up to 24x 2.5-inch small form factor (SFF) drives in the 2U24 SFF expansion enclosure, up to 12x 3.5-inch large form factor (LFF) drives in the 2U12 LFF expansion enclosure, or up to 60x 3.5-inch LFF drives in the 4U60 LFF expansion enclosure.
- For "All-Flash" a maximum scalability to up to 120 SFF drives by attaching up to four ThinkSystem DE240S 2U24 SFF expansion enclosures.
- For "Hybrid" a maximum scalability to up to 444 drives by attaching up to seven ThinkSystem DE600S 4U60 LFF expansion enclosures to satisfy growing needs.
- Rich set of standard storage management functions available at no extra cost, including Dynamic Disk Pools, snapshots, volume copy and encryption.
- Optional licensed functions, including higher number of drives and snapshots for greater scalability for continuous data availability.
- Intuitive, web-based GUI for easy system setup and management.
- Designed for 99.9999% availability with redundant hot-swap components, including controllers and I/O modules, power supplies, cooling modules (4U60 LFF enclosures only), proactive maintenance, and non-disruptive firmware upgrades.

The ThinkSystem DE6600F and DE6600H support the complete range of data storage requirements, from highly used applications to high-capacity, low usage applications.

The DE6600F and DE6600H 2U24 SFF expansion enclosure and expansion enclosures offer a variety of drives. Refer to the drives section for a list of supported drives. All drives are dual-port and hot-swappable. For the DE6600F system HDD Intermix (within enclosure) is not supported. For the DE6600H system HDD Intermix (within enclosure) is supported which provides the flexibility to address performance and capacity needs within a single enclosure.

Customers can intermix 2U24 SFF, 2U12 LFF, and 4U60 LFF expansion enclosures behind a 2U24 SFF controller enclosure. This configuration delivers the added flexibility to mix 3.5-inch and 2.5-inch drives within a single system.

More drives and expansion enclosures are designed to be dynamically added with virtually no downtime, which helps to quickly and seamlessly respond to ever-growing capacity demands.

The ThinkSystem DE6600F and DE6600H offer high levels of system and data availability with the following technologies:

- Dual-active controller modules with automatic load balancing and failover
- Mirrored data cache with flash backup (battery-backed destaging to flash)
- Dual-port SAS HDDs and SSDs with automatic drive failure detection and rebuild with global hot spares
- Redundant, hot-swappable and customer replaceable hardware components, including SFP/SFP+ transceivers, controller and I/O modules, power supplies, cooling modules (4U60 LFF only), and drives
- Automated path failover support for the data path between the host and the drives with multipathing software
- Non-disruptive controller and drive firmware upgrades

Note: HDD SAS 10k rpm are not supported for the ThinkSystem DE6600F and DE6600H.

Comparing the DE6600F and DE6600H to the previous generation

This section compares the Lenovo ThinkSystem DE6600F and DE6600H to the DE6400, as well as the previous generation DE6000.

Table 1. Comparing the DE6600F to the DE6400F and the previous generation DE6000F

Feature	DE6000F	DE6400F	DE6600F	Benefits
Segment	Entry midrange AFA	Midrange NVMe	High-end NVMe	<ul style="list-style-type: none"> • The new DE All-Flash solutions are Lenovo's first NVMe offering for the DE Series. Components and connectors

The following figure shows the front of the DE6600F enclosure controller and DE6600H looks like it with DE6600H label.

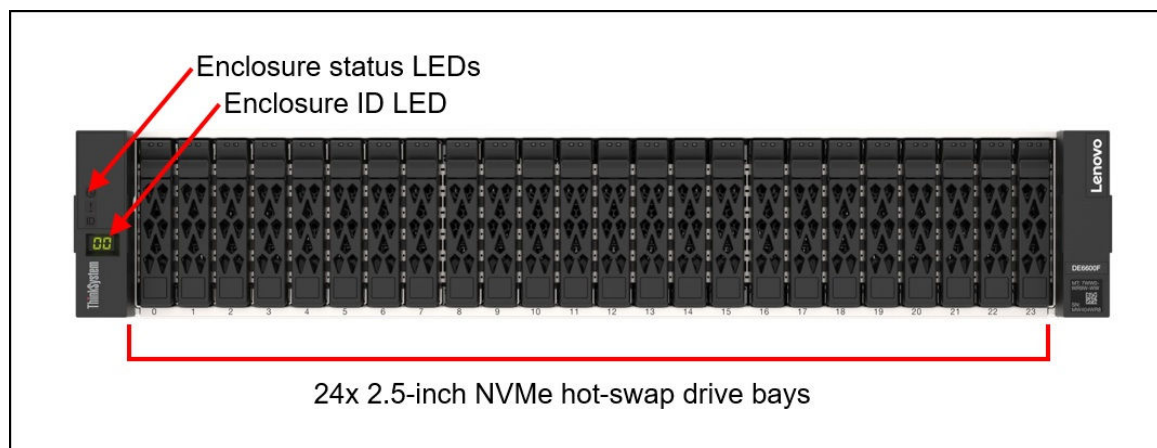

Figure 2. DE6600F enclosure controller front view.

The following figure shows the rear of the ThinkSystem DE6600F and DE6600H 2U SFF controller enclosure.

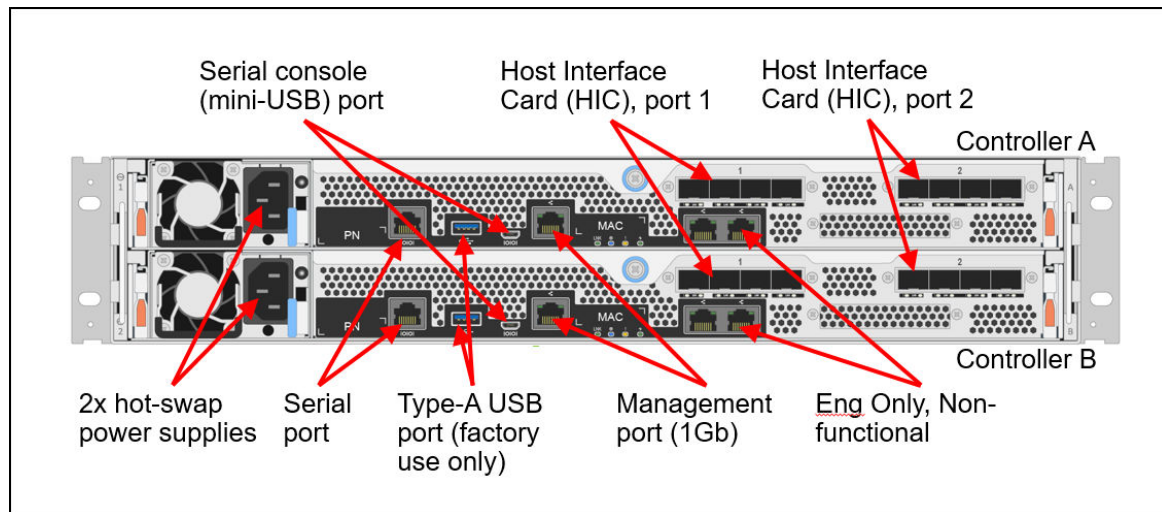

Figure 3. ThinkSystem DE6600F and DE6600H 2U SFF controller enclosure rear view

The rear of the ThinkSystem DE6600F and DE6600H 2U SFF controller enclosure includes the following components:

- Two controllers. Each controller with the following ports:
 - One Serial (RS-232) port.
 - **Note:** The DE6600F and DE6600H controllers no longer offers base ports
 - One service (USB) (Not functional) port.
 - One serial console (mini-USB) port.
 - One management (1GbE) port.
 - Eng only (Not functional) ports.
 - Bay 1/port 1 for HIC host connections (FC, iSCSI, IB) and optional SAS expansion card.
 - Bay 2/port 2 for HIC host connections (FC, iSCSI, IB)
- Two redundant hot-swap 1181W AC (220V) power supplies (IEC 320-C14 power connector).
- PSU and system fans are installed in the controller enclosure (not chassis).

The following figure shows the front of the DE240S 2U SFF expansion enclosure.

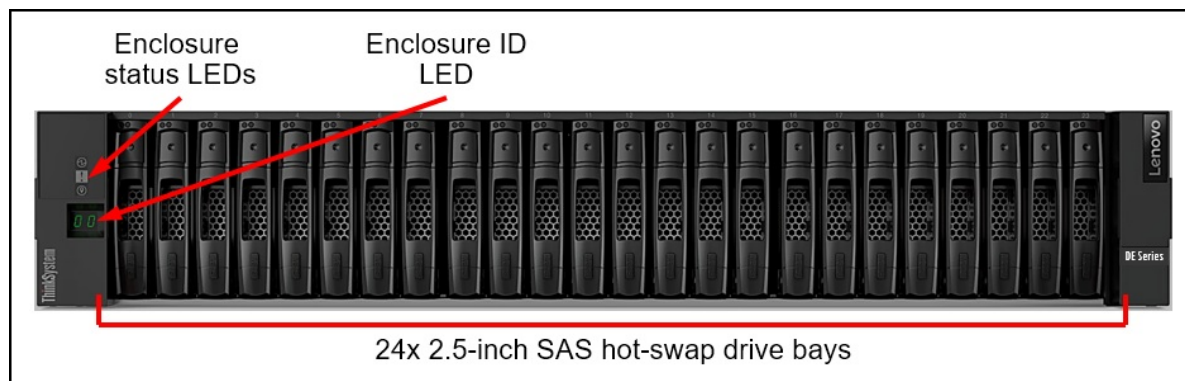

Figure 4. DE240S 2U SFF expansion enclosure front view.

The front of the DE240S 2U SFF expansion enclosure includes the following components:

- 24 SFF hot-swap drive bays
- Enclosure status LEDs

- Enclosure ID LED

The following figure shows the front of the ThinkSystem DE120S 2U LFF expansion enclosure.

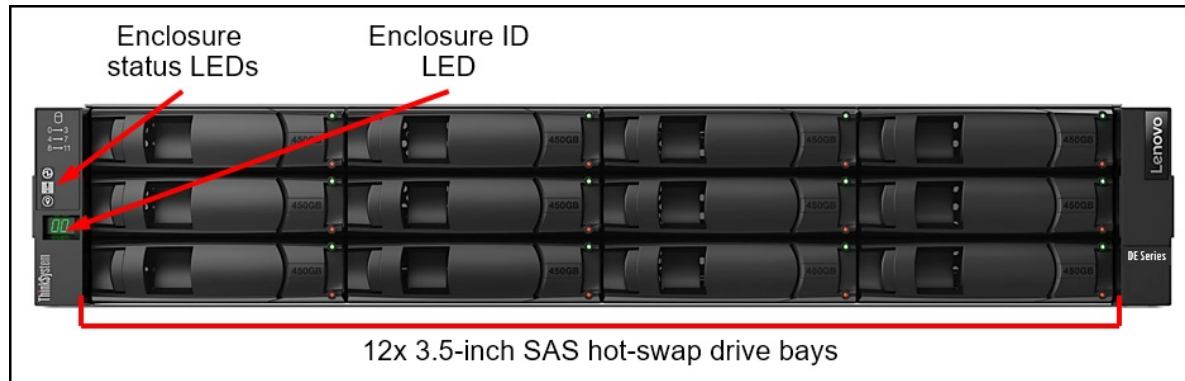

Figure 5. ThinkSystem DE120S 2U LFF expansion enclosure front view.

The front of the ThinkSystem DE120S 2U LFF expansion enclosure includes the following components:

- 12 LFF hot-swap drive bays
- Enclosure status LEDs
- Enclosure ID LED

The following figure shows the rear of the ThinkSystem DE240S and DE120S 2U expansion enclosures.

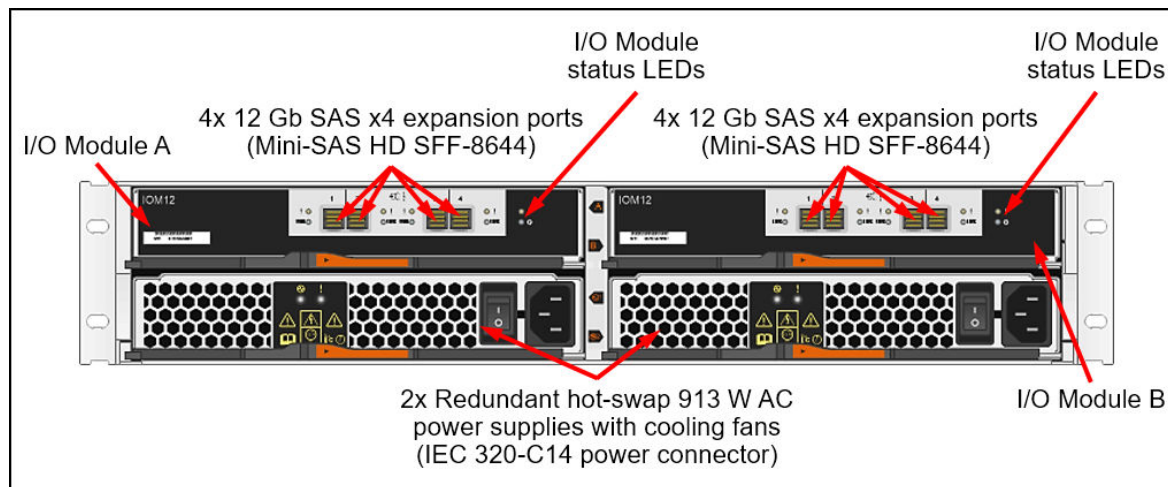

Figure 6. ThinkSystem DE240S and DE120S 2U expansion enclosures rear view

The rear of the ThinkSystem DE240S and DE120S 2U expansion enclosures includes the following components:

- Two redundant hot-swap I/O Modules; each I/O Module provides four 12 Gb SAS x4 expansion ports (Mini-SAS HD SFF-8644) for connections to the controller enclosures and for connecting the expansion enclosures between each other.
- Two redundant hot-swap 913 W AC (100 - 240 V) power supplies (IEC 320-C14 power connector) with integrated cooling fans.

The following figure shows the rear of the ThinkSystem DE600S 4U LFF expansion enclosure.

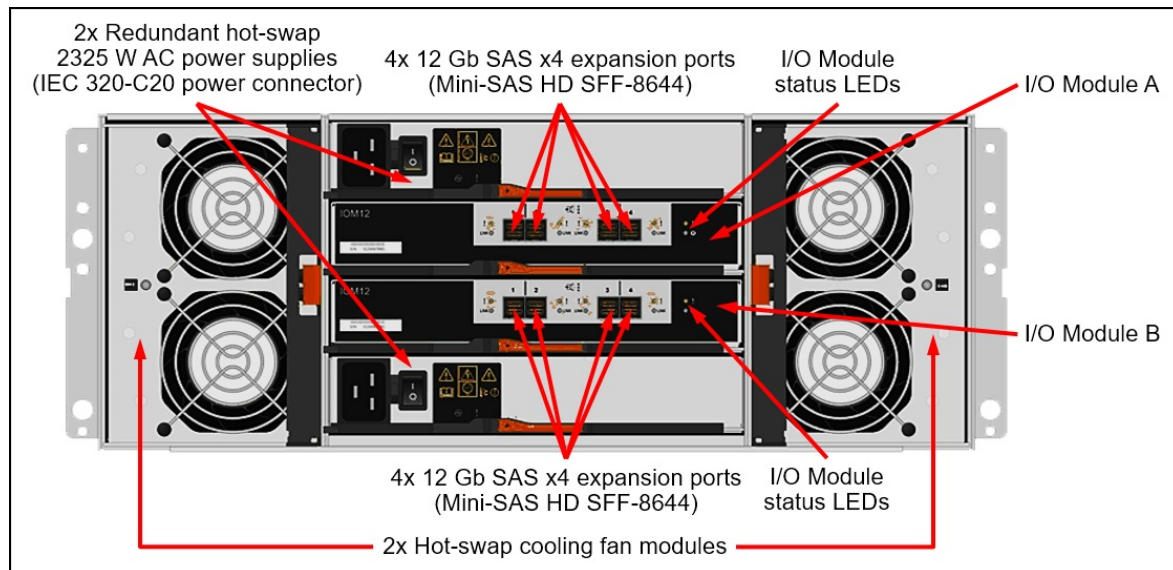

Figure 7. ThinkSystem DE600S 4U LFF expansion enclosure rear view

The rear of the ThinkSystem DE600S 4U LFF expansion enclosure includes the following components:

- Two redundant hot-swap I/O Modules; each I/O Module provides four 12 Gb SAS x4 expansion ports (Mini-SAS HD SFF-8644) for connections to the controller enclosures and for connecting the expansion enclosures between each other.
- Two redundant hot-swap 2325 W AC (200 - 240 V) power supplies (IEC 320-C20 power connector)
- Two hot-swap cooling fan modules; each module has two fans.

Note: The failed cooling module should be replaced as soon as possible.

System specifications

The following table lists the DE6600F and DE6600H storage system specifications.

Note: The supported hardware options, software features, and interoperability listed in this product guide are based on the Lenovo SAN OS 11.70.4. For details about specific software releases that introduced support for certain hardware options and software features, refer to the Release notes of the particular software release that can be found at:

<http://datacentersupport.lenovo.com>

* Estimated performance based on internal measurements

** There is no support for 10k SAS drives.

Controller enclosures

The following table lists the CTO base models for the ThinkSystem DE6600F and DE6600H.

Table 4. ThinkSystem DE6600F and DE6600H CTO base models

Machine Type/Model	Base feature	Description
7DB7CTO1WW	7DB7	Lenovo ThinkSystem DE6600 All Flash NVMe 2U24
7DB7CTO2WW	7DB7	Lenovo ThinkSystem DE6600 Hybrid NVMe 2U24

Configuration notes:

- Note: No mixing of host protocols

The models of the ThinkSystem DE6600F and DE6600H ship with the following items:

- One chassis with the following components:
 - Two controllers
 - Two power supplies
 - Two host interface cards
- Rack Mount Kit
- 2 m USB Cable (USB Type A to Micro-USB)
- Two power cables:
 - Relationship models listed in this section:
 - 2U24 SFF: 1.5 m, 10A/100-250V, C13 to IEC 320-C14 rack power cables
 - CTO models: Customer-configured power cables

Controllers

The ThinkSystem DE6600F and DE6600H enclosures ship with two controllers, and each controller provides 32 GB or 128 GB system memory for a system total of 64 GB or 256 GB respectively. A *controller* provides interfaces for host connectivity, management, and internal drives, and it runs storage management software.

- Each controller has two bays or ports for host interface card (HIC).
- Each controller supports 1 x (optional) SAS expansion card in bay1/port1 (mini-SAS HD SFF-8644 connectors) for the attachment of the ThinkSystem DE Series expansion units. 4 ports per controller.

The following host interfaces can be added to the ThinkSystem DE6600F and DE6600H controller enclosures with HICs:

- 8x 10/25 GbE SFP28 ports (4 ports per HIC) for 10/25 Gb iSCSI connectivity (require optical transceivers or DAC cables that should be purchased for the HICs).
- 8x 16/32 Gb FC SFP+ ports (4 ports per HIC) for FC or NVMe/FC connectivity (require optical transceivers that should be purchased for the HICs).
- 2x 100Gb NVMe-IB/RoCE, SRP, QSFP28 ports (2 ports per HIC in port 2 only) for NVMe/RoCE connectivity (require optical transceivers or DAC cables that should be purchased for the HIC).

Configuration notes:

- Both controllers must have the same system memory: 32 GB or 128 GB.
- Two or four host interface cards are required for selection in bay 1/port 1 and bay 2/port 2 (per controller).
- No mixing of host protocols
- Both controllers must have the same type of the host interface card installed (16/32 Gb FC SFP+, 10/25 Gb iSCSI SFP28, or 100 GbE NVMe/RoCE QSFP28), and both cards must have SFP+/SFP28/QSFP28 media of the same type (either optical transceivers or DAC cables, but not both types).

The following table lists the DE6600F and DE6600H controllers and supported connectivity options.

Table 5. DE6600F and DE6600H controllers and connectivity options

** For current Lenovo SAN OS 11.70.4 – max qty 2 - in bay2/port2 only.

*** No field upgrade available.

Expansion enclosures

In the base configuration, the ThinkSystem DE6600F and DE6600H supports attachment of up to four expansions: 4xDE600S 4U60 LFF, or 4xDE240S 2U24 SFF, or 4xDE120S 2U12 LFF. These expansions can be mixed up to the aforementioned maximums.

Maximum drives:

- All Flash- 120 (1 x DE6600F controller NVMe + 4xDE240S SAS, SSD)
- Hybrid- 444 (1 x DE6600H controller NVMe + 7xDE600S SAS, SSD)

Note: DE120S and DE600S are not supported with All Flash controller.

The following table lists the CTO base models for the ThinkSystem DE Series expansion enclosures.

Table 6. ThinkSystem DE240S, DE120S, and DE600S CTO base models

Description	Machine Type/Model	Feature code		
		European Union	Other markets	World Wide
Lenovo ThinkSystem Storage DE240S 2U24 Chassis (with 2x PSUs)	7Y68CTO1WW	BEY7	B38L	-
Lenovo ThinkSystem Storage DE120S 2U12 Chassis (with 2x PSUs)	7Y63CTO1WW	BEY6	B38M	-
Lenovo ThinkSystem Storage DE600S 4U60 Chassis (with 2x PSUs)	7Y69CTO2WW	-	-	BQ9W

Configuration notes:

- For CTO models, two I/O expansion modules are selected by default in the configurator, and the selection cannot be changed.

The models of the ThinkSystem DE240S, DE120S, and DE600S ship with the following items:

- One chassis with the following components:
 - Two I/O modules
 - Two power supplies
 - Two cooling modules (4U60 LFF only)
- Four 1 m MiniSAS HD 8644/MiniSAS HD 8644 cables (Models listed in Tables 6 and 7)
- Rack Mount Kit
- Quick Installation Guide*
- Electronic Publications Flyer*
- Two power cables:
 - CTO models: Customer-configured power cables

Each ThinkSystem DE Series expansion enclosure ships with two SAS I/O expansion modules. Each *I/O expansion module* provides four external 12 Gb SAS x4 ports (Mini-SAS HD SFF-8644 connectors labelled Port 1-4) that are used for connections to the ThinkSystem DE6600F and DE6600H and for daisy chaining the expansion enclosures between each other.

Two expansion ports on the Controller A are connected to the Ports 1 and 2 on the I/O Module A in the first expansion enclosure in the chain, and the Ports 3 and 4 on the I/O Module A in the first expansion enclosure are connected to the Ports 1 and 2 on the I/O Module A in the adjacent expansion enclosure, and so on.

Two expansion ports on the Controller B are connected to the Ports 1 and 2 on the I/O Module B in the last expansion enclosure in the chain, and the Ports 3 and 4 on the I/O Module B in the expansion enclosure are connected to the Ports 1 and 2 on the I/O Module B in the adjacent expansion enclosure, and so on.

The connectivity topology for the DE Series expansion enclosures is shown in the following figure.

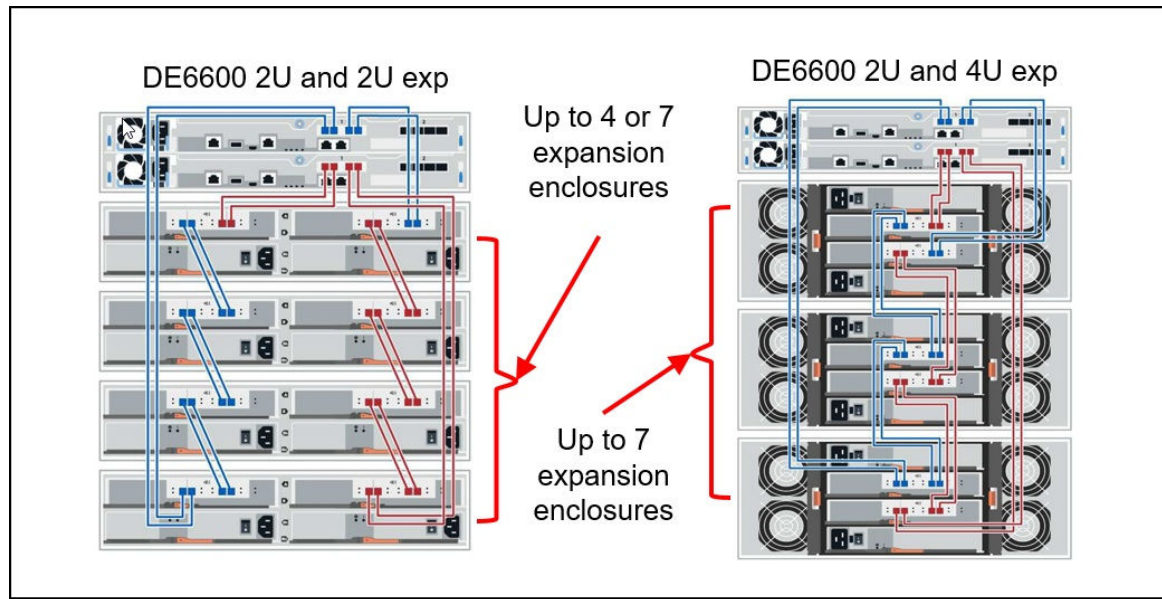

Figure 8. ThinkSystem DE6600F and DE6600H expansion enclosure connectivity topology

The following table lists ordering information for the supported expansion enclosure connectivity options.

Table 7. Expansion unit connectivity options

Description	Part number	Feature code	Quantity per one expansion enclosure
External MiniSAS HD 8644/MiniSAS HD 8644 0.5M Cable	00YL847	AU16	8
External MiniSAS HD 8644/MiniSAS HD 8644 1M Cable	00YL848	AU17	8
External MiniSAS HD 8644/MiniSAS HD 8644 2M Cable	00YL849	AU18	8
External MiniSAS HD 8644/MiniSAS HD 8644 3M Cable	00YL850	AU19	8

Configuration notes:

- Four SAS cables are needed per each expansion enclosure (two SAS cables per I/O Module) for connections to the controller enclosure and for daisy chaining of the expansion enclosures.
- The length of the SAS cables that connect a 2U24 or 2U12 enclosure to an adjacent 4U60 enclosure should be at least 1 meter.

Drives

The ThinkSystem DE6600F and DE6600H controller enclosure support up to 24 NVMe drives.

Expansion enclosure support is as follows:

- The DE240S 2U24 SFF expansion enclosure supports 24 SFF drives.
- The DE120S 2U12 LFF expansion enclosure supports 12 LFF drives.
- The DE600S 4U60 LFF expansion enclosure supports 60 LFF drives.

Shipping requirement: 2U12 and 2U24 enclosures can be shipped with all drive bays populated, however the 4U60 enclosures must be shipped with drives removed.

The following table lists supported drive options for the ThinkSystem DE6600F and DE6600H controller enclosure.

Table 8. DE6600 2U24 SFF controller enclosure drive options

4XB7A86721	BUCA	Lenovo ThinkSystem DE6000H 38.4TB Pack (20x 1.92TB SAS SSDs)	3

Configuration notes:

- For an all-flash configuration (DE6600F enclosure controller and DE240S expansion controllers) SSDs only (no HDD drives support). Such configuration supports a maximum of 120 SSDs.
- For hybrid configuration (DE6600H enclosure controller and expansion controllers (DE120S/DE240S/DE600S)) NL-SAS and SSDs drives are supported.
- A minimum of 20 drives is required for each 4U60 LFF enclosure (the front row of each drawer must be populated with four drives).
- Intermix of FIPS drives and non-FIPS drives is supported within the system.

Software

The following functions are included with every ThinkSystem DE6600F and DE6600H:

- **RAID levels 0, 1, 3, 5, 6, and 10** : Provide the flexibility to choose the level of performance and data protection required.
- **Dynamic Disk Pools (DDP) technology**: Helps improve performance and availability with significantly faster rebuild time and reduced exposure to multiple drive failures by allowing data and built-in spare capacity to be distributed across all physical drives in the storage pool.
- **All Flash Array (AFA) capability**: Meets the demand for higher speed storage and provide higher IOPS and bandwidth with lower power usage and total cost of ownership than hybrid or HDD-based solutions.
- **Snapshots**: Enables creation of copies of data for backup, parallel processing, testing, and development, and have the copies available almost immediately
- **Encryption**: Provides encryption for data at rest for enhanced data security with the optional FIPS 140-2 Level 2 drives and embedded key management (AES-256) or an external key management server.
- **Automatic load balancing**: Provides automated I/O workload balancing of I/O traffic from the hosts across both controllers.
- **Data assurance**: Ensures industry-standard T10-PI end-to-end data integrity in the storage system (from the host ports to the drives).
- **Dynamic volume and capacity expansion**: Allows the capacity of a volume to be expanded by adding new physical drives or making use of unused space on existing drives.

Software maintenance is included in the ThinkSystem DE6600F and DE6600H base warranty and optional warranty extensions, which provides 3-year software support with the option to extend it up to 5 years in 1-year or 2-year increments (see [Warranty and support](#) for details).

Management

The DE6600F and DE6600H supports the following management interfaces:

- ThinkSystem System Manager, a web-based interface via HTTPS for single-system management, that runs on the storage system itself and requires only a supported browser, so there is no need for a separate console or plug-in. For more information, see the [System Manager Online Help](#).
- ThinkSystem SAN Manager, a host-installed GUI-based application, for centralized management of multiple storage systems. For more information, see the [SAN Manager Online Help](#).
- ThinkSystem DE Series Storage Plugin for vCenter. For more information, see the [DE Series vCenter Plugin Online Help](#).
- Command line interface (CLI) via SSH or through serial console. For more information, see the [CLI Online Help](#).
- Syslog, SNMP, and e-mail notifications.
- Optional Lenovo XClarity Administrator support for discovery, inventory, and monitoring.

Power supplies and cables

The ThinkSystem DE Series 2U24 SFF and 2U12 LFF enclosures ship with two redundant hot-swap 913W (100-240V) Platinum AC power supplies, each with an IEC 320-C14 connector:

The ThinkSystem DE Series 4U60 LFF enclosures ship with two redundant hot-swap 2325 W (200 - 240 V) Platinum AC power supplies, each with an IEC 320-C20 connector.

The CTO models require the selection of two power cables.

The following table lists the rack power cable and line cord options that can be ordered for the DE Series 2U24 SFF enclosures (two power cords per enclosure).

Table 13. Power cables for DE Series 2U24 SFF and 2U12 LFF enclosures

Rack installation

The individually shipped ThinkSystem DE Series 2U12 enclosures come with the ThinkSystem Storage Rack Mount Kit 2U12, and the individually shipped ThinkSystem DE Series 2U24 and 4U60 enclosures come with the ThinkSystem Storage Rack Mount Kit 2U24/4U60. These rack mount kits are listed in the following table.

Table 15. 4-post rack mount kits

Description	Feature code	Quantity
Lenovo ThinkSystem Storage Rack Mount Kit 2U12	B38X	1

When the ThinkSystem DE Series enclosures are factory-integrated and shipped installed in a rack cabinet, the rack mount kits that support Ship-in-Rack (SIR) capabilities are derived by the configurator. The SIR-capable rack mount kits are listed in the following table.

Table 16. 4-post SIR rack mount kits

Description	Feature code	Quantity
Lenovo ThinkSystem Storage Rack Mount Kit 2U12	B38X	1
Lenovo ThinkSystem Storage SIR Rack Mount Kit (for 2U24 enclosures)	B6TH	1
DE 4U Adjustable Rail Kit (SIR)	B742	1

The following table summarizes the rack mount kit features and specifications.

Table 17. Rack mount kit features and specifications summary

Attribute	Screw-in fixed rail with adjustable depth			
	2U12	2U24/4U60	2U24 SIR	4U SIR
Feature code	B38X	B38Y	B6TH	B742
Enclosure support	DE120S	DE6600F and DE6600H 2U DE240S DE600S‡	DE6600F and DE6600H 2U DE240S	DE600S‡
Rail type	Fixed (static) with adjustable depth	Fixed (static) with adjustable depth	Fixed (static) with adjustable depth	Fixed (static) with adjustable depth
Tool-less installation	No	No	No	No
In-rack maintenance	Yes*	Yes*	Yes*	Yes*
Ship-in-rack (SIR) support	Yes	No	Yes	Yes
1U PDU support	Yes	Yes	Yes	Yes
0U PDU support	Limited**	Limited**	Limited**	Limited**
Rack type	IBM or Lenovo 4-post, IEC standard-compliant	IBM or Lenovo 4-post, IEC standard-compliant	IBM or Lenovo 4-post, IEC standard-compliant	IBM or Lenovo 4-post, IEC standard-compliant
Mounting holes	Square or round	Square or round	Square or round	Square or round
Mounting flange thickness	2 mm (0.08 in.) – 3.3 mm (0.13 in.)	2 mm (0.08 in.) – 3.3 mm (0.13 in.)	2 mm (0.08 in.) – 3.3 mm (0.13 in.)	2 mm (0.08 in.) – 3.3 mm (0.13 in.)
Distance between front and rear mounting flanges^	605 mm (23.8 in.) – 812.8 mm (32 in.)	605 mm (23.8 in.) – 812.8 mm (32 in.)	605 mm (23.8 in.) – 812.8 mm (32 in.)	605 mm (23.8 in.) – 812.8 mm (32 in.)

‡ The rack cabinet must be at least 1100 mm (43.31 in.) deep for 4U60 enclosures.

* The majority of the enclosure components can be serviced from the front or rear of the enclosure, which does not require the removal of the enclosure from the rack cabinet.

** If a 0U PDU is used, the rack cabinet must be at least 1000 mm (39.37 in.) deep for 2U12 and 2U24 enclosures, or at least 1200 mm (47.24 in.) deep for 4U60 enclosures.

^ Measured when mounted on the rack, from the front surface of the front mounting flange to the rear most point of the rail.

Physical specifications

The DE6600F and DE6600H 2U24 SFF enclosure:

- Height: 87 mm (3.4 in.)
- Width: 447 mm (17.6 in.)
- Depth: 543 mm (21.4 in.)

The ThinkSystem DE Series 2U24 SFF enclosures have the following dimensions:

- Height: 85 mm (3.3 in.)
- Width: 449 mm (17.7 in.)
- Depth: 553 mm (21.8 in.)

The ThinkSystem DE Series 2U12 LFF enclosures have the following dimensions:

- Height: 85 mm (3.3 in.)
- Width: 447 mm (17.6 in.)
- Depth: 483 mm (19.0 in.)

The ThinkSystem DE Series 4U60 LFF enclosures have the following dimensions:

- Height: 174 mm (6.9 in.)
- Width: 449 mm (17.7 in.)
- Depth: 922 mm (36.3 in.)

Weights of enclosures (fully configured):

- DE6600F and DE6600H 2U24 SFF controller enclosure (7DB7): 25.07 kg (55.3 lb)
- DE240S 2U24 SFF expansion enclosure (7Y68): 27.44 kg (60.5 lb)
- DE120S 2U12 LFF expansion enclosure (7Y63): 27.12 kg (59.8 lb)
- DE600S 4U60 LFF expansion enclosure (7Y69): 112.2 kg (247.4 lb)

Operating environment

The ThinkSystem DE Series 2U24 SFF and 4U60 LFF enclosures are supported in the following environment:

- Air temperature:
 - Operating:
 - DE240S 2U24 SFF: 5 °C - 45 °C (41 °F - 113 °F)
 - DE120S 2U12 LFF: 10 °C - 40 °C (50 °F - 104 °F)
 - Non-operating: -10 °C - +50 °C (14 °F - 122 °F)
 - Maximum altitude: 3050 m (10,000 ft)
- Relative humidity:
 - Operating: 8% - 90% (non-condensing)
 - Non-operating: 10% - 90% (non-condensing)
- Electrical power:
 - 200 to 240 V AC (nominal); 50 Hz / 60 Hz
- Acoustical noise emission:
 - DE600S 4U60 SFF: 7.2 bels
 - DE240S 2U24 SFF and DE120S 2U12 LFF: 6.6 bels

The following table lists the maximum enclosure power load, inlet current, and heat output based on the source voltage.

Table 18. Enclosure power load, inlet current, and heat output

Enclosure	Source voltage (nominal)	Maximum power load	Current per inlet	Heat output
DE6600F and DE6600H 2U24 SFF	200 - 220 V AC	1150 W	5.48 A	4030 BTU/hour
DE240S 2U24 SFF	200 - 240 V AC	382 W	2.02 A	1304 BTU/hour
DE120S 2U12 LFF	200 - 240 V AC	300 W	1.58 A	1024 BTU/hour
DE600S 4U60 LFF	200 - 240 V AC	1446 W	7.62 A	4934 BTU/hour

Warranty and support

The ThinkSystem DE Series enclosures have a three-year customer-replaceable unit (CRU) and onsite limited (for field-replaceable units [FRUs] only) warranty with standard call center support during normal business hours and 9x5 Next Business Day Parts Delivered.

Lenovo's additional support services provide a sophisticated, unified support structure for a customer's data center, with an experience consistently ranked number one in customer satisfaction worldwide.

The following Lenovo support services are available:

- Premier Support** provides a Lenovo-owned customer experience and delivers direct access to technicians skilled in hardware, software, and advanced troubleshooting, in addition to the following capabilities:
 - Direct technician-to-technician access through a dedicated phone line.
 - 24x7x365 remote support.
 - Single point of contact service.
 - End to end case management.
 - 3rd Party collaborative software support.
 - Online case tools and live chat support.
 - On-demand remote system analysis.
- Warranty Upgrades (Preconfigured Support)** are available to meet the on-site response time targets that match the criticality of customer's systems:
 - 3, 4, or 5 years of service coverage.
 - 1-year or 2-year post-warranty extensions.
 - Foundation Service:** 9x5 service coverage with next business day onsite response, with optional YourDrive YourData.
 - Essential Service:** 24x7 service coverage with 4-hour onsite response or 24-hour committed repair (available only in select regions), with optional YourDrive YourData.
 - Advanced Service:** 24x7 service coverage with 2-hour onsite response or 6-hour committed repair (available only in select regions), with optional YourDrive YourData.
- Managed Services**
 Lenovo Managed Services provide continuous 24x7 remote monitoring (plus 24x7 call center availability) and proactive management of a customer's data center using state of the art tools, systems, and practices by a team of highly skilled and experienced Lenovo services professionals.

 Quarterly reviews check error logs, verify firmware and operating system device driver levels, and software as needed. Lenovo will also maintain records of latest patches, critical updates, and firmware levels, to ensure customer's systems are providing business value through optimized performance.
- Technical Account Management (TAM)**
 A Lenovo Technical Account Manager helps customers optimize operations of their data centers based on a deep understanding of customer's business. Customers gain direct access to a Lenovo TAM, who serves as their single point of contact to expedite service requests, provide status updates, and furnish reports to track incidents over time. Also, a TAM helps proactively make service recommendations and manage service relationship with Lenovo to make certain that customer's needs are met.

- **YourDrive YourData**

Lenovo's YourDrive YourData service is a multi-drive retention offering that ensures that customer's data is always under their control, regardless of the number of drives that are installed in their Lenovo system. In the unlikely event of a drive failure, customers retain possession of their drive while Lenovo replaces the failed drive part. Customer's data stays safely on customer premises, in their hands. The YourDrive YourData service can be purchased in convenient bundles with Foundation, Essential, or Advanced Service upgrades and extensions.

- **Health Check**

Having a trusted partner who can perform regular and detailed health checks is central to maintaining efficiency and ensuring that customer systems and business are always running at their best. Health Check supports Lenovo-branded server, storage, and networking devices, as well as select Lenovo-supported products from other vendors that are sold by Lenovo or a Lenovo-Authorized Reseller.

Some regions might have different warranty terms and conditions than the standard warranty. This is due to local business practices or laws in the specific region. Local service teams can assist in explaining region-specific terms when needed. Examples of region-specific warranty terms are second or longer business day parts delivery or parts-only base warranty.

If warranty terms and conditions include onsite labor for repair or replacement of parts, Lenovo will dispatch a service technician to the customer site to perform the replacement. Onsite labor under base warranty is limited to labor for replacement of parts that have been determined to be field-replaceable units (FRUs). Parts that are determined to be customer-replaceable units (CRUs) do not include onsite labor under base warranty.

If warranty terms include parts-only base warranty, Lenovo is responsible for delivering only replacement parts that are under base warranty (including FRUs) that will be sent to a requested location for self-service. Parts-only service does not include a service technician being dispatched onsite. Parts must be changed at customer's own cost and labor and defective parts must be returned following the instructions supplied with the spare parts.

Lenovo support services are region-specific. Not all support services are available in every region. For information about Lenovo support services that are available in a specific region, refer to the following resources:

- Service part numbers in Data Center Solution Configurator (DCSC):
<http://dcsc.lenovo.com/#!/services>
- Lenovo Services Availability Locator
<https://lenovolocator.com/>

For service definitions, region-specific details, and service limitations, refer to the following documents:

- Lenovo Statement of Limited Warranty for Infrastructure Solutions Group (ISG) Servers and System Storage
<http://pcsupport.lenovo.com/us/en/solutions/ht503310>
- Lenovo Data Center Services Agreement
<http://support.lenovo.com/us/en/solutions/ht116628>

Services

Lenovo Services is a dedicated partner to your success. Our goal is to reduce your capital outlays, mitigate your IT risks, and accelerate your time to productivity.

Note: Some service options may not be available in all markets or regions. For more information, go to <https://www.lenovo.com/services>. For information about Lenovo service upgrade offerings that are available in your region, contact your local Lenovo sales representative or business partner.

Here's a more in-depth look at what we can do for you:

- **Asset Recovery Services**

Asset Recovery Services (ARS) helps customers recover the maximum value from their end-of-life equipment in a cost-effective and secure way. On top of simplifying the transition from old to new equipment, ARS mitigates environmental and data security risks associated with data center equipment disposal. Lenovo ARS is a cash-back solution for equipment based on its remaining market value, yielding maximum value from aging assets and lowering total cost of ownership for your customers. For more information, see the ARS page, <https://lenovopress.com/lp1266-reduce-e-waste-and-grow-your-bottom-line-with-lenovo-ars>.

- **Assessment Services**

An Assessment helps solve your IT challenges through an onsite, multi-day session with a Lenovo technology expert. We perform a tools-based assessment which provides a comprehensive and thorough review of a company's environment and technology systems. In addition to the technology based functional requirements, the consultant also discusses and records the non-functional business requirements, challenges, and constraints. Assessments help organizations like yours, no matter how large or small, get a better return on your IT investment and overcome challenges in the ever-changing technology landscape.

- **Design Services**

Professional Services consultants perform infrastructure design and implementation planning to support your strategy. The high-level architectures provided by the assessment service are turned into low level designs and wiring diagrams, which are reviewed and approved prior to implementation. The implementation plan will demonstrate an outcome-based proposal to provide business capabilities through infrastructure with a risk-mitigated project plan.

- **Basic Hardware Installation**

Lenovo experts can seamlessly manage the physical installation of your server, storage, or networking hardware. Working at a time convenient for you (business hours or off shift), the technician will unpack and inspect the systems on your site, install options, mount in a rack cabinet, connect to power and network, check and update firmware to the latest levels, verify operation, and dispose of the packaging, allowing your team to focus on other priorities.

- **Deployment Services**

When investing in new IT infrastructures, you need to ensure your business will see quick time to value with little to no disruption. Lenovo deployments are designed by development and engineering teams who know our Products & Solutions better than anyone else, and our technicians own the process from delivery to completion. Lenovo will conduct remote preparation and planning, configure & integrate systems, validate systems, verify and update appliance firmware, train on administrative tasks, and provide post-deployment documentation. Customer's IT teams leverage our skills to enable IT staff to transform with higher level roles and tasks.

- **Integration, Migration, and Expansion Services**

Move existing physical & virtual workloads easily, or determine technical requirements to support increased workloads while maximizing performance. Includes tuning, validation, and documenting ongoing run processes. Leverage migration assessment planning documents to perform necessary migrations.

Regulatory compliance

The ThinkSystem DE Series enclosures conform to the following regulations:

- United States: FCC Part 15, Class A; UL 60950-1 and 62368-1
- Canada: ICES-003, Class A; CAN/CSA-C22.2 60950-1 and 62368-1
- Argentina: IEC60950-1
- Mexico NOM
- European Union: CE Mark (EN55032 Class A, EN55024, IEC/EN60950-1 and 62368-1); ROHS Directive 2011/65/EU
- Russia, Kazakhstan, Belarus: EAC
- China: CCC GB 4943.1, GB 17625.1, GB 9254 Class A; CELP; CECF
- India: BIS
- Japan: VCCI, Class A
- Taiwan: BSMI CNS 13438, Class A; CNS 14336-1
- Korea KN32/35, Class A
- Australia/New Zealand: AS/NZS CISPR 22 Class A

Interoperability

Lenovo provides end-to-end storage compatibility testing to deliver interoperability throughout the network. The ThinkSystem DE6600F and DE6600H Hybrid Storage Array supports attachment to Lenovo ThinkSystem, System x, and Flex System hosts by using SAS, iSCSI, Fibre Channel, NVMe over Fibre Channel (NVMe/FC), or NVMe over RoCE (RDMA over Converged Ethernet) (NVMe/RoCE) storage connectivity protocols.

For end-to-end storage configuration support, refer to the Lenovo Storage Interoperation Center (LSIC): <https://datacentersupport.lenovo.com/us/en/lxic>

Use the LSIC to select the known components of your configuration and then get a list all other supported combinations, with details about supported hardware, firmware, operating systems, and drivers, plus any additional configuration notes. View results on screen or export them to Excel.

Fibre Channel SAN switches

Lenovo offers the ThinkSystem DB Series of Fibre Channel SAN switches for high-performance storage expansion. See the DB Series product guides for models and configuration options:

- ThinkSystem DB Series SAN Switches:
<https://lenovopress.com/storage/switches/rack#rt=product-guide>

Lenovo Financial Services

Lenovo Financial Services reinforces Lenovo's commitment to deliver pioneering products and services that are recognized for their quality, excellence, and trustworthiness. Lenovo Financial Services offers financing solutions and services that complement your technology solution anywhere in the world.

We are dedicated to delivering a positive finance experience for customers like you who want to maximize your purchase power by obtaining the technology you need today, protect against technology obsolescence, and preserve your capital for other uses.

We work with businesses, non-profit organizations, governments and educational institutions to finance their entire technology solution. We focus on making it easy to do business with us. Our highly experienced team of finance professionals operates in a work culture that emphasizes the importance of providing outstanding customer service. Our systems, processes and flexible policies support our goal of providing customers with a positive experience.

We finance your entire solution. Unlike others, we allow you to bundle everything you need from hardware and software to service contracts, installation costs, training fees, and sales tax. If you decide weeks or months later to add to your solution, we can consolidate everything into a single invoice.

Our Premier Client services provide large accounts with special handling services to ensure these complex transactions are serviced properly. As a premier client, you have a dedicated finance specialist who manages your account through its life, from first invoice through asset return or purchase. This specialist develops an in-depth understanding of your invoice and payment requirements. For you, this dedication provides a high-quality, easy, and positive financing experience.

For your region-specific offers, please ask your Lenovo sales representative or your technology provider about the use of Lenovo Financial Services. For more information, see the following Lenovo website:
